STEVENS'S
American Bibliographer.

Stevens's American Bibliographer.

PRELIMINARY.

THERE is not perhaps in the whole range of Modern History a more gigantic theme for the future historian than the story of the discovery, conquest, planting and development of the New World. From the embarkation of Columbus at Palos in 1492, to the final ratification and adoption of the Constitution of the United States of America in 1789, is a period worthy the genius of a master mind. But so numerous, scattered and crude are the materials, that it will require the energies of many collaborators to work up the innumerable minor topics before the master historian can with advantage combine and digest them into one harmonious whole.

The impulse which the valuable and well known *Bibliothecas* of M. Ternaux-Compans and, more especially, of my late and lamented friend Mr. O. Rich, gave to the collection of books relating to America, shows how highly such works are appreciated. More recently, however, the indefatigable researches of many collectors both public and private, in Europe as well as in America, combined with the unprecedented high prices of books and manuscripts of this class, have been the means of bringing to light so many works hitherto uncatalogued and undescribed, that a larger, more comprehensive

and more accurate Bibliotheca is now much needed. Following therefore my own inclination, but at first little dreaming of the amount of labour I was about to undertake, I more than seven years since volunteered to devote my humble labours to the Bibliography of this subject. In other words, my aim was and still is, according to the best of my powers, to afford to the future historians of my country and continent a complete BIBLIOGRAPHIA AMERICANA: or, a Bibliographical Account of the sources of early American History, comprising brief biographies of Authors who have written upon America, and a description of all books relating to America from the earliest period to the year 1789, and of the principal books printed in America from 1543 to 1789, together with notices of many of the more important unpublished Manuscripts.

PLAN OF THE WORK.

1. A brief biography will, whenever practicable, precede the list of each author's works.

2. The work will contain a descriptive list of all books relating to America, and of all books printed in America, prior to the year 1789, which may be found in the principal public and private libraries of Europe and America, or which are described in other works; together with notices of many of the more important unpublished manuscripts.

3. The descriptions will be made, as far as possible, from an examination of the books themselves. If any be taken from other sources of information, they will be distinguished by some peculiar mark.

4. The titles, including the imprint or colophon, will in all cases be given in full, word for word, and letter for letter, together with a translation into English of all titles in other languages.

5. The *collation* of each book will be given ; that is, such a description as will indicate a perfect copy.

6. The market value of the books, with the prices at which they have been sold at public sales, will, whenever possible, be given.

7. Different editions and various translations of the principal works will be diligently compared with each other, and their variations and relative merits pointed out, especially of such works as the Collections of Voyages and Travels by De Bry, Hulsius, Ramusius, Hakluyt, Purchas, Thevenot, etc. ; the corresponding parts of which will be compared, not only with each other, but with the editions of the works from which they were translated, abridged, or reprinted.

8. Bibliographical Notes will be appended when deemed necessary, containing abstracts of the contents of the works when the titles fail to give a proper idea of them ; anecdotes of authors, printers, engravers, etc. ; important items of historical and geographical information ; notices of peculiarities of copies, as large paper, vellum, cancelled leaves, etc. ; the number of copies printed ; together with the comparative rarity and intrinsic value of the works.

9. The notes upon the books printed in America will comprise a full history of the origin and progress of printing in North and South America, from the year 1543 to 1789.

10. Under the title of every work will be designated one or more libraries in which it may be found.

11. The titles will be arranged alphabetically, under the names of the authors, or the leading word of the title.

12. The work will contain a full Introductory Memoir upon the materials of early American History, together with an account of the principal collections of them which have been made in Europe and America.

13. Three Indexes to the contents of the work will be

given, viz. (1) A chronological index, in which the titles will be arranged according to the years in which the works were printed ; (2) An index of the subjects treated in the books ; (3) An alphabetical index of the persons and subjects mentioned in the Notes and Introductory Memoir.

14. When the manuscript of the work shall have been completed, according to the plan detailed above, it is to be delivered to the Secretary of the SMITHSONIAN INSTITUTION, at Washington, who will in accordance with the Rules of the Institution as published in the *Programme of Organization*, of Dec. 8, 1847, submit it to a commission of competent judges. If this commission report favourably as to the faithful execution of the work, it is to be published and distributed at the sole expense of the SMITHSONIAN INSTITUTION, constituting two or more volumes of the quarto series of SMITHSONIAN CONTRIBUTIONS TO KNOWLEDGE.

Now, I have advanced sufficiently far in the *Bibliographia Americana* to know that it is perfectly impossible to prepare the *copy* with sufficient accuracy to print from at a time and place when and where the rare books described cannot be referred to. It has therefore been found necessary to make a preliminary issue of the more difficult parts by throwing into type the titles of each work in full, correcting the proofs from the books themselves as they pass through my hands, or are found in the library of the British Museum or elsewhere. By this means I shall not only 'book' materials for the *Bibliographia* as I meet with them, but shall be enabled to receive the kind co-operation of librarians and bibliographers in the examination and collation of rare books relating to America. The materials thus collected, it is proposed to re-arrange and elaborate according to the plan detailed above for the Smithsonian Institution. To avoid confusion this preliminary work will

be considered as privately printed, and be issued to subscribers only, in the form of a monthly periodical, under the title of STEVENS'S AMERICAN BIBLIOGRAPHER. Brief collations of each book will be given, with occasional notes, illustrations, etc. ; but desiring to interfere as little as possible with the *Bibliographia Americana*, nothing will be printed in this which can as well be printed for the first time in the larger work. Although no expense or pains will be spared to secure accuracy in this preliminary issue, yet I deem it expedient to print only one hundred copies, limiting the whole number of Subscribers to seventy-five, and hope I may be fortunate enough to secure those among librarians and bibliographers, twenty-five in Europe and fifty in America, who will be kind enough to point out to me such inaccuracies and variations as they may detect in comparing my titles and observations with their own.

The *American Bibliographer* will be published in monthly numbers, each containing at least forty-eight pages ; but as the work progresses, if it be found possible to proceed faster, extra numbers will be printed from time to time, each of which will be complete in itself, and be devoted to one particular subject, as, for instance, the Jesuit Relations, De Bry, Hulsius, etc. The *American Bibliographer* will be continued so long as materials for it can be found, probably two or three years.

(This figure represents to us the people and island which have been discovered by the Christian King of Portugal or by his subjects. The people are thus naked, handsome, brown, well shaped in body, their heads, necks, arms, private parts, feet of men and women are a little covered with feathers. The men also have many precious stones in their faces and breasts. No one also has any thing, but all things are in common. And the men have as wives those who please them, be they mothers, sisters, or friends, therein make they no distinction. They also fight with each other. They also eat each other even those who are slain, and hang the flesh of them in the smoke. They become a hundred and fifty years old. And have no government.)

* * * The above text in German, occupies four lines beneath an old block leaf, nine by thirteen inches square, representing the manners and customs of the natives of the Northern and Eastern coast of South America as first found by the Portuguese at the end of the 15th or beginning of the 16th century. It is without date, but was probably printed at Augsburg, or Nuremburg, between the years 1497 and 1504. It is believed to be unique. A facsimile of this earliest known xylographic leaf respecting America is here inserted.

Plate at p. 783.* Large Folio.

* * A Second and important volume of this work was printed at Lima in 1653, but was never published, owing probably to certain obnoxious passages contained in it. It is a smaller volume than the first, and is of very rare occurrence. My copy wants the title, and some of the marginal notes have been cut off, probably by the Inquisition. It has 6 preliminary leaves, without the title. Book I. is folioed to 15, and paged thence to 268. Book II. has one pre-lim. leaf, and breaks off abruptly with the 42nd page. Then follows the 5th Book in 92 pp. Then come 2 leaves containing the Table of the whole volume. In this the Fifth Book is called the *third* in order.

This edition is particularly valuable as being the only one containing the Plan of the City of Mexico as it existed before the Conquest, and the Chart of the entire Gulf of Mexico, both of which are referred to in the Second Relation of Cortes, dated the 30th of October, 1520, as being sent to the Emperor with that Relation. They are not known to have been printed in the Spanish Editions. The Plan and the Chart are both on a large wood block, and are here inserted in fac-simile. The Mississippi River and the Province of Amachel are indicated with considerable accuracy. This wood cut is of rare occurrence.
